

TWI Platinum Tool Series

The Best Combination Of Quality, Performance And Value

Your one-stop shop for wrapping interior, commercial, PPF, colour change and window tint.

Design Lab Double Axe and Single Axe PPF and Wrap Installation Tools

Double Axe and Single Axe tools are ideal for use in the application of colour change or printed wrap films and PPF films. They assist in tucking films into tight spaces and cutting and sealing films into place. Best when used together. The thick edge can be used to open moldings and tuck films behind them where the thin edge is best for sealing and cutting. The curved, this cutting end cuts safely and as effectively as a blade. It can be resharpened with fine-grit sandpaper.

Edgeless 365 Cleaning and Edgeless Pearl Ceramic Coating Microfibre Towels

The Edgeless 365 Cleaning And Polishing Towels are edgeless, unsewn edge, dual-pile polishing and cleaning towels made of premium quality, lint-free microfiber. The plush side of the cloth is ideal for the delicate surfaces such as the tighter, shorter knap side is perfect for buffing. Recommended for buffing and polishing chrome, metal, glass and mirror, removing polish, waxes and sealants and also for cleaning wheel wells and door jams.

The Cyclone Ultra Premium Microfibre Wash Mitt or Wash Pad

The Cyclone Ultimate wash mitt or Cyclone Ultimate wash pad are made from high quality, long-fibre Korean microfibre with padding, and are built to last. The mitt includes an elasticized wrist-cuff to ensure that it remains on your hand for the entire wash allowing you to tuck into nooks and crannies. Measuring 5" x 8" for the mitt and 10" x 10" for the pad, these are padded, lint free washing and detailing tools that are built to last.

Pearl Puck Microfibre Ceramic Coating Applicator Sponge

The Pearl Puck Applicator is a round, palm sized, microfiber wrapped, dense foam-cored sponge for the application of ceramic coatings. The combination of dense foam and plastic interior barrier reduces coating waste and supplies a smooth, consistent application.

Platinum Magnet Mat

The TWI Platinum Magnet Mat is a two-sided, foldable magnetic mat designed for holding vinyl wrap on vehicles or to hold tools and small parts. This mat is perfect for auto detailing and wrapping as it will attract to any flat or curved metal surface. Useful for keeping metal parts grouped and organized for faster re-assembly. It is durable and resists oil, and common shop chemicals.

Red Chenille Knobby Microfibre Wash Mitt

The Wrap Institute large red, chenille microfiber mitt with a black elastic cuff for use in cleaning vehicles prior to vinyl application. Tagless, this mitt will not scratch delicate surfaces and includes a loop for hanging to dry. Made of high quality microfiber. One size fits all.

Design Lab Ninja Red Wrap Knife and Replacement Blades

Ninja Red Wrap Knife is a 0.30mm cutting knife that is a lightweight utility wrap knife. The lighter weight reduces hand fatigue and ensures safety when cutting directly on a surface. Replacement stainless steel, 0.30mm blades are sold 50 per pack.

Platinum Wrap Squeegees

Platinum squeegees are high quality squeegees with medium firmness. Designed for general purpose installations and ideal for vehicle wraps. The squeegee has three rounded corners for smooth installation and contours, and one square corner for tucking and finishing. Can be combined with Banana Buffers and Monkey Strips.

Weldy HG 330S Car Wrap Heat Gun

WELDY HG 330S is a high-performance heat gun for car wrap installations. It offers variable temperature adjustment from 176F to 1,112F and a two-stage blower. The HG 330-S heat guns' high heating capabilities and high blowing strength coupled with low weight and ergonomic design, is the perfect tool for your wrap film installation and removal needs.

Triple S Wrap Install Solution

Triple S, a versatile solution for vehicle wrap installation, offers an easy three-step process: SLIP for prep, SLIDE for installation, and SHINE for finishing. This innovative formula enhances film application, prevents scratches, and provides a lasting protective finish.

Diamond Weave Glass Towels

Achieve a streak-free, lint-free shine on glass, windows, and mirrors with these durable, diamond-textured microfiber towels. Designed for countless washes, they're perfect for professional or home use, ensuring a flawless finish with simple care.

Absolute Rinseless Auto Wash Concentrate

Absolute Rinseless Wash Concentrate works by encapsulating and emulsifies dirt beyond what soap can do. Water is softened when Absolute is mixed into the water reducing chances of hard water spotting. The end-result is a spotlessly clean surface.

Liquid8R Twist Loop Microfibre Drying Towel

The Liquid8r is a large 16" x 16", two sided, twist-loop drying towel. Its heavyweight 1100gsm weight gives it a satisfying weight. Made of high quality 70/30 micro-fibre blend with a hemmed hidden edge. The lint-free, twist loop design absorbs a good deal of water while being gentle to surfaces. Ideal for use after Absolute Rinseless Wash.

Ultra Clay Scrubber Sponges

Ultra clay scrubber sponges are 4" x 6" x 1", and are designed to be used with a lubricant during cleaning. The perforated surface is covered with clay on the face and one side of the sponge, with the back side uncoated. This combination allows for decontamination and also the removal of bugs, tar or light over spray. Best for use prior to waxing, ceramic coating or the application of vehicle wrap. Can also be used on glass prior to coating or tint installation. Sold in packs of 2.

Magstrapz V2 Magnetic Adjustable Heat Gun Straps

Magstrapz V2 are adjustable, hook and loop straps with a large embedded magnet. The V2 offers a centre hole which has been designed for use with heat guns with centred handles. The side-positioned magnet is strong enough to safely hold the heat gun on the flat metal surfaces of automobiles and fleet vehicles, freeing up hands for vinyl installation. Fits most centre-handled heat guns and can be positioned to either the left or right-hand side.
